

1) didn't see any difference in x and q option

logging out from where?

```
Selection: x  
Logging out...  
Quiting...  
root@gluubntu:~#
```

```
Selection: q  
Quiting...  
root@gluubntu:~#
```

2) give yes/no option at below

3) add multiple option to update/search attribute except inum

4) there must be option to restart all services.(Ex: jans-auth,fido2)

5) errors should be self explanatory:  
user will not understand what is issue with below

```
Gets all Jans authorization server configuration properties
